

WHO WE ARE

We are a software factory born in 2009 as the "outsourcing factory" of the 24ORE Group (the leading Italian multimedia publishing organization) that develops for third party, enterprise grade companies using latest generation technologies and methodologies.

Since 2009 we have gone a long way and had the opportunity of collaborating with lead companies in building anything from web & mobile apps to complex industry 4.0 solutions.

WHAT WE DO

Industry 4.0 Application, Smart Manufacturing and augmented reality

Reengineering of software applications already on the market, but technologically outdated (code optimization, architecture review, renovation of the graphical user interface, complete rewrite).

New Applications Development (Web / Desktop): from Proof Of Concept to final application ready for market release and complete of installer toolkit, code obfuscation, license manager...

Mobile Apps: native (iOS, Android) and cross-platform (Xamarin)

Training, consulting and technology evangelism with specialization on Microsoft technologies, web technologies (Angular, React, Vue, TypeScript...) and methodologies / tools for C. Integration and C. Deployment (Microsoft DevOps)
