

Company profile

1934

Costante Piovan & Figli, a workshop specialising in precision mechanics, was founded in Padua.

60's

Luigi, Costante's son, guides Piovan in the market of auxiliary machinery for the plastics industry.

70's

From single units to complete systems with the introduction of the first refrigeration line and central feeding, blending and drying solutions.

80's

Introduction of electronics, partnerships with OEMs and further growth on foreign markets.

90's

The innovation continues by acquisition of a Software House to develop remote plant monitoring and process control.

00's

Nicola, Luigi's son, drives the transformation of the Group from an auxiliaries manufacturer to a turn-key engineering reality. Una-Dyn and Fdm are acquired.

10's

The Group enters the food market and consolidates its position in plastics acquiring Penta, Progema, Fea and Doteco. Aquatech starts its operations in industrial cooling. The Group enters into the FTSE ITALIA STAR INDEX as a Public Company.

20's

In 2021 the Group receives its first ESG Risk Rating issued by Sustainalytics. In January 2022 Piovan has completed the acquisition of IPEG, the U.S. industrial group comprised of the four brands Conair, Thermal Care, Pelletron and Republic Machine.

PIOVAN GROUP

Piovan Group is the global leader in the development and production of industrial automation systems for storage, conveying and processing of polymers, plastics and food powders. Customers, People and Innovation are the cornerstones of the Group's philosophy:

- Understanding customers' needs is the foundation of our work.
- Talented personnel are our most precious asset.
- Innovation is our objective today, tomorrow, and always.

297 R&D engineers

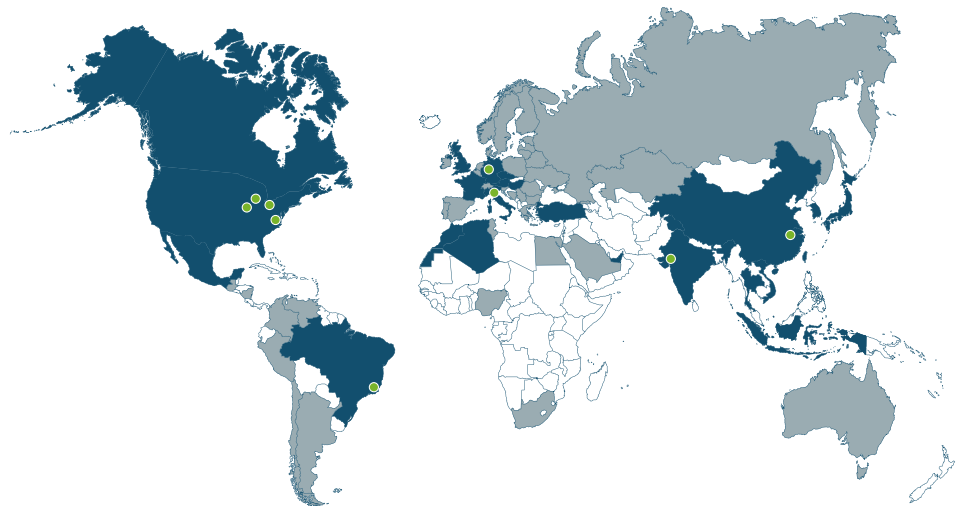

4 % R&D investment

310 service specialists

The Group counts 1.800+ collaborators worldwide, 14 production facilities, 43 sales and service branches and representatives covering 70+ countries.

OUR GLOBAL PRESENCE

● Production plants

■ Production, service and sales branches

■ Distributors and representatives

SYSTEMS FOR THE PLASTICS INDUSTRY

Able to handle

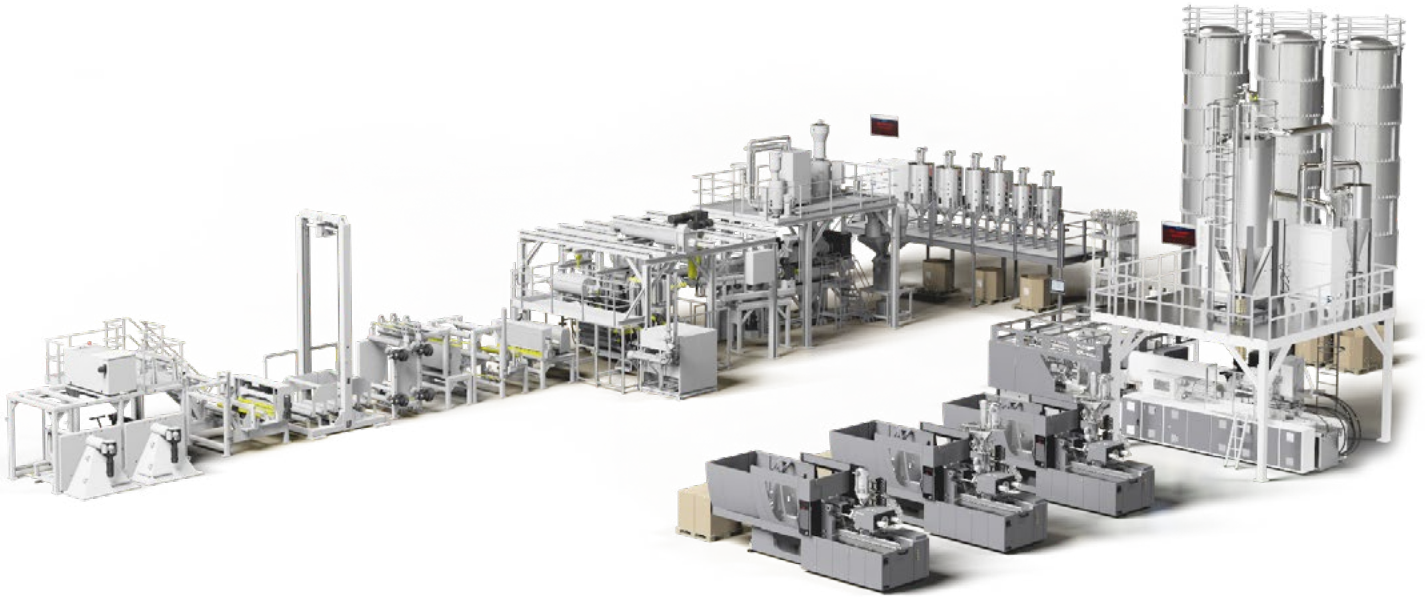

Granules

Flakes

Powders

SYSTEMS FOR THE FOOD INDUSTRY

Able to handle

Powders

Liquids

Creams

The environmental challenges we're currently facing concern: climate change, depletion of natural resources, polluting the environment. Whereas plastic is already environmentally friendly for the former two, it needs to be recycled to avoid pollution. Dealing with recycled plastic is very different from virgin raw material.

Dealing with post-consumer plastic can be problematic. Piovan Group assists its partners with:

- Solutions for post consumed plastic and biopolymers
- Systems for reduction and control of contaminants
- Safe, traceable and stable processes.
