bluewind

WHO ARE WE?

Bluewind is the reference engineering company for the development of Dependable Systems.

Complex Dependable Systems are safe, secure, available and reliable.

With over 25 years of experience and a dedicated agile team, we guide our customers throughout every step of the project to find tailored, efficient and unbiased solutions for their unique needs.

MISSION

Our mission is to empower decision makers within a network of industries, universities and scientific institutions to achieve their product and idea development goals by enhancing their creative and technological capabilities.

VISION

Our vision is to be the strategic R&D partner to leading organizations that are seeking to design complex & demanding products, efficiently, effectively, and timely.

SECTORS

INDUSTRIAL
We develop leading & Safety-compliant engineering solutions for complex Industrial products.

AUTOMOTIVE
We provide solutions integrating AI and Safety technologies for autonomous vehicles.

AEROSPACE
We create safe and reliable Aerospace systems according to the highest Functional Safety standards.

MEDICAL
We develop intelligence in the medical equipment using AI and deep learning.

HOME, LIGHT & BUILDING
We leverage a combination of hardware, software, wireless design, AI, and IoT technologies to create secure and reliable embedded systems for home and building automation.

SERVICES

PRODUCT DEVELOPMENT

Once the customer's needs are identified, we provide system modeling, hardware design, wireless & antenna design, software development, followed by unit and integration test.

STRATEGIC CONSULTANCY

We provide tailored consultancy services to assist customers in bringing their product ideas to life, including product strategy, technical analysis, Safety critical systems gap analysis.

TOOLS SUPPORT

We are official distributors and competence center for a suite of embedded tools which are at the foundation of system development: Compilers, Debuggers, Real Time Operating Systems and Test Suites.

ACADEMY

Bluewind Academy offers hands-on trainings for developers, engineers and students to create reliable, testable, and safe electronic systems.

VALUES

QUALITY

Continuously striving to provide the best possible value.

RELIABILITY

Driven by passion, empowered by integrity.

RESPONSIBILITY

Focused on both the social and physical environment.

INCLUSION

Fostering a multi-cultural environment where everyone is respected & valued.

WANNA JOIN US?

If you have a passion for product development with embedded electronics and you are looking for an exciting opportunity, we would love to hear from you. Whether you are a recent graduate or an experienced professional, we welcome applications of all backgrounds.

If you think you have what it takes, please send your CV to stefano.costa@bluewind.it, and we will get back you.
